Our master piece, Importa's 'Juwel' album, is specially designed for the finest Dutch stamps and is made of the best materials. The stamps are presented on a slightly tinted quality paper with fitted Hawid mounts. "Dog-ears" cannot occur because the leaves have rounded corners. The hinge slots guarantee that the leaves always lie flat when the book is open. The binder is made of high quality imitation leather.

Your precious collection is safely preserved. In manufacturing the Patentto stockbooks, everything is taken into account. Our Patentto stockbooks are provided with glassine strips with a 3 mm folded edge, which makes them extra strong. The 175 x 225 mm sized leaves have 7 transparent strips per page and the 230 x 305 mm leaves have 10 of these reinforced strips per page. There are two sheets of glassine interleaving between the pages. The Patentto stockbooks have a balacron binder and a linen reinforced spine. They are available in five different colours. Patentto 555, 777 and 999 are also available with a middle division (recognizable by the five-cornered star on the spine).

Bristol stockbooks are famous for their quality. They are handmade, solid and almost indestructible. The sturdy linen strips, which reinforce the spine are the proof of its fine craftsmanship. Each page has ten glassine strips and double glassine interleaving have been fitted between the pages. The Bristol albums have an imitation leather cover with gold coloured metal corners and double hinging, so that the leaves always lie flat when the book is open! Many stamp collectors choose these extremely solid Bristol stockbooks for their excellent quality.

The black background provides a magnificent presentation for the precious First Day Covers. The leaves are made of transparent softener-free polypropylene. Each album has 12 black leaves with one or two compartments. The opening is on the interior short side, so that the covers cannot get a 'dusty edge'. Additional leaves are available from your supplier. PS II is available with "First Day Covers" or "Eerste Dag Enveloppen" in gold-colour lettering.

The detection of fluor/phosphor on stamps and banknotes is getting more and more easy with the Super Mini UV lamps and the Money & Stamp Detector. The Super Mini UV lamps are small and cordless and therefore easy to transport. The Long Wave UV lamp can be used to detect fluor/phosphor on stamps and false banknotes. The Short Wave UV lamp is especially adapted for the analysis of phosphor on stamps from e.g. Great Britain, Israel and the United States. Importa's Money & Stamp Detector most easily detects false banknotes as well as fluor/phosphor stamps.

PRODUCT RANGE

- Super Mini UV lamps, working on 4 Penlite batteries (not supplied):
 - 366 NM Long Wave (art. 0200) € 10,50
 - 254 NM Short Wave (art. 0219) € 27,50
- UV lamp working on 220 Volt (desk model):
 - Money & Stamp Detector 366 NM (art. 0250) € 17,00
